PROFESSIONAL PROFILE

IT graduate with hands on full stack experience across production web and mobile development platforms, working with PHP and MySQL at iKhono Africa, JavaScript and React at Plum Systems, and React Native with C#, PostgreSQL 18 and .NET 9 at MetroLink startup.
Experienced in designing database structures, building secure endpoints, managing code through GitLab, and supporting deployment processes including DNS configuration, FTP based deployments, and cloud deployment via Railway and Vercel.
A dependable and detail oriented full stack developer who performs well in structured, fast paced environments. Now seeking an entry level or junior software development role where I can continue to grow technically across both web and mobile platforms while contributing meaningfully to a professional development team.

KEY SKILLS

- Database Management: MySQLWorkbench, PostgreSQL 18, MySQL
- SpringBoot Framework (MVC, CRUD, Security)
  Object Oriented Programming with Java
- React, HTML, CSS, PHP, JavaScript & REST APIs
  Python Programming
- JUnit Testing
  Version Control & Collarboration: Git, Github, Gitlab
- Software Design Principles & Practices
- VS Code / Repository Management
- Trello Project Management
- Joomla CMS (Backend & Frontend)
- C# & .NET 9 Development
- Skilled in React Native (Expo), Zustand & Axios
  Cloud Deployment Platforms: Railway & Vercel

EDUCATION

National Senior Certificate
Silversands Secondary School
(2019)
School Prefect in Matric

Higher Certificate in Information Communication and Technology
Cape Peninsula University of Technology
(2021)

Diploma ICT in Applications Development
Cape Peninsula University of Technology
(2022 - 2024)

Advanced Diploma ICT in Applications Development
Cape Peninsula University of Technology
(2025)

Experience

JUL 2024 - JUN 2025
Duration: 12 months

Web Developer Intern | Plum Systems | API Property & OfficePlace Production

HTML5, CSS3, JavaScript | Joomla | React | Bootstrap | GitLab

• Contributed to the development and maintenance of production web applications for business clients.
• Developed and enhanced frontend features using JavaScript and React to improve usability, responsiveness, and UI consistency.
• Built and customised website components, forms, and content pages using Joomla CMS.
• Applied Bootstrap to ensure responsive and user friendly interface designs across devices.
• Resolved bugs and implemented feature updates, pushing code via GitLab for review and integration.
• Assisted in maintaining live production systems, ensuring performance stability and client satisfaction.

JAN 2026 - PRESENT

Software Developer Intern | iKhono | Artisan Services Platform | Startup Project

HTML5, CSS3, JavaScript (Vanilla) | PHP 7.4+ | MySQL | REST APIs | DNS Management | FileZilla

Developing a web based platform that connects artisans and service providers with clients, focusing on service discovery, bookings, and profile management.

Summary and Responsibilities:

• Designed and implemented database schemas to support core platform functionality using PHP and MySQL.
• Assisted with frontend functionality including dynamic filtering, form handling, and API integration using JavaScript.
• Built and tested secure endpoints for bookings, reviews, and enquiries, with a focus on data validation.
• Assisted with DNS configuration and deployed website updates using FileZilla (FTP).
• Contributed to both client-facing and service-provider interfaces across the web platform.

JAN 2026 - PRESENT

Full Stack Developer | MetroLink Cape Town | Personal | Startup Project

NET 9 | React Native (Expo)| PostgreSQL 18 | SignalR | JWT Auth | Zustand | Axios | GitLab CI/CD | C# | JavaScript

A full stack transport intelligence platform integrating Metrorail and MyCiTi services, built to provide real time delay updates, route performance metrics, and push notifications to commuters via a connected mobile application.

Summary and Responsibilities:

- Built and integrated full stack features across backend and mobile frontend in a collaborative 2 person Agile team.
- Contributed to real time transport updates via SignalR WebSockets and assisted with JWT authentication and role based access control.
- Participated in code reviews, GitLab CI/CD pipelines, and cloud deployment using Railway and PostgreSQL hosting.
- Assisted with API integration between the mobile client and backend, ensuring secure communication using Axios interceptors and Bearer token enforcement.
